Subject: Fw: Action Needed on Moving Rosemont Project

To: Jason Brush
Water and Wetland Group

As an Arizona resident I ask your support from the EPA to move forward now on the Rosemont Mine. The approval process for this project has taken an extraordinary amount of time thru the many state and federal agencies .The due-diligence by agencies including many pubic hearings has found the proposed mine to be in compliance of all significant regulations and guidelines.

The benefits of the Rosemont project are huge not only for Southern Arizona but for our nation. As a retired Project Mgr. and supporter of protecting our environement I would encourage your timely action on this matter.

Regards,
Gary W. Tindall
Project Mgr. (Retired)
